

Pre-ID:

Our Pre-Identification service covers various California state assessments including CAHSEE, STAR, CELDT, and Physical Fitness Testing.

Key Data Systems specializes in working with California assessment data and has formulated a systematic, error-resistant process for compiling your Pre-ID file.

The Pre-ID service includes obtaining the district data (this typically involves the district providing Key Data Systems with a data file or files containing the required data). We run verification reports to provide you summary data for review and revision. These verification reports help to ensure the accuracy of your Pre-ID submission and SIS data.

We submit the finalized Pre-ID file to the appropriate testing company and address any upload requirements.
